

Remarks

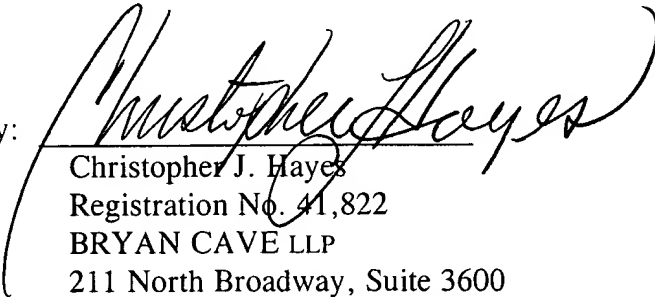

In the Office Action issued on September 25, 2000, the Examiner indicated that claims 1-51 pending in the application were allowed. However, the Examiner required that the drawings be amended to show the following features recited in the claims: "controlled space," "speed controllers," and "cooling controller."

In accordance with 37 C.F.R. § 1.121(a)(3)(ii), enclosed herewith are sketches showing the proposed changes to the figures in red ink, filed for approval by the Examiner. The proposed amendment to the drawings corrects the objection raised by the Examiner. Formal drawings will be submitted upon allowance. The specification is amended to make reference to the figures added to the drawings.

It is respectfully submitted that the foregoing amendment corrects the objection raised in the Office Action and places the application in a condition for allowance. The Examiner is encouraged to contact the undersigned attorney to resolve any remaining issues.

Respectfully submitted,

By:
